

What T'Challa's speech to the United Nations should include as the contribution to advanced technology to be shared with the world by Wakanda by David Price

- fiberoptics (Northover)
- transatlantic cable (Richardson)
- idea of alternating crops to prevent crop failure, 100 products derived from peanuts (George Washington Carver)
- brass weights to measure gold (Ashante)
- Great Pyramid of Giza was a tomb for a black king, Khufu
- Nimrod, 300 BCE, was the 'African' Stonehenge
- Dogon of Mali, 1300 BCE, without a telescope, did the impossible, discovered rings of Saturn, moons of Jupiter, Milky Way is spiral, could see the star Sirius
- synthesis of steroids, progesterone, testosterone, cortisone, birth control pills, medicinal plants (Percy Lavon Julian)
- artificial heart stimulator, guided missile and computer development (Otis Boykin)
- electro gas dynamics to produce energy (Meredith Gourdine)
- mobile refrigeration in food transport (Frederick McKinley Jones)
- mass production of shoes (Jan Matzeliger)
- electric light for the home (Lewis Latimer)
- rotary blade, ironing board, lawn mower (Lonnie George Johnson)
- Bell and Edison's draftsmen
- fitted bedsheets, detachable band that encircles the mattress, without it you have to make a hospital corner only nurses seem to be able to do not to mention a bedsheet tangled around your leg when you wake up without one (Bertha Berman)
- Other: gas mask, traffic sign, folding bed, x-ray spectrometer, drug for leprosy, cataract surgery, spark plug, rotary engine, brain tumor treatment, blue baby treatment, computer chip
- (my favorite since I am a retired math teacher) development of mathematics, while Europe could not even count or multiply without, suffering with Roman numerals, (Hindu/Arabic numbers were not 'accepted' until the Renaissance), African traders with no abstract mathematical system, used a kind of abacus calculator (quinary (base 5)/quinquagesimal system (base 20) very successfully.
